Adwaith Sreenivasan

925.216.8711 | adwaitha@gmail.com | LinkedIn | Portfolio

Systems Engineering and Design student at UIUC focused on CV/AR, digital manufacturing, and data analytics.

EDUCATION

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN — **Champaign, IL, USA**

- Major: Systems Engineering and Design | SFO: Digital Prototyping | Minor: Informatics — *Expected December 2026*
- Relevant Courses: AI-Driven Intelligent Systems | Intro to AI (Stanford) | Analysis of Data | Models in Optimization | Design for Manufacturability | Component Design | Computer-Aided Mfg Systems | Comp-Aided Product Realization
- Skills: Python, SQL, CVAT, Grafana, Fusion 360, SolidWorks, TouchDesigner, 3D Printing, CNC, AI Tools

WORK EXPERIENCE

TIDAL X AI — **Mountain View, CA, USA**

Perception ML Engineering Intern — *May 2026–Present*

- Built and productionized a top-view salmon keypoint detection pipeline for aquaculture video, spanning CVAT tooling, TFExample/W&B datasets, Vertex AI training, Triton/TensorRT deployment, and pipeline integration.
- Built CVAT tooling and managed annotator workflows for four-point salmon skeleton labeling, validating large-scale keypoint datasets across Mowi and ISA pen domains for scalable model training, review, and iteration.
- Created BigQuery/Dataflow validation workflows and qualitative overlay tools to compare model versions, diagnose domain-specific failures, and guide filtering/model-quality improvements for production readiness and deployment.

TRYDAN TECH (BATTERY & EV DESIGN) — **Coimbatore, TN, IN**

Design and Digital Manufacturing Intern — *July 2024–August 2024*

- Modeled exterior body panel components in Fusion 360 for a low-speed electric scooter at Trydan Tech, translating industrial design intent into manufacturable parts for an alternative-fuel mobility startup prototype.
- Co-directed a design feedback survey of 1,000+ participants, analyzing customer preferences to guide data-informed industrial design improvements, user experience decisions, and electric scooter product strategy.

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN — **Champaign, IL, USA**

Undergraduate Workshop Assistant, Jackson Innovation Studio — *August 2023–May 2025*

- Assisted engineering students with workshop setup and operation of fabrication tools including 3D printers, laser tools, and CNC equipment while maintaining safe, organized, and production-ready lab workflows for rapid prototyping.

PREDIKLY (AI/TECH CONSULTING) — **Mountain View, CA, USA**

Data Analytics Intern, Tidal X AI Project — *June 2023–August 2023*

- Built data curation dashboards and streamlined ML dataset access for Tidal using SQL, CVAT annotation workflows, and Grafana visualizations to support ocean ecosystem monitoring, analysis, and model iteration.

PROJECTS

LIVE-LENS.AI

Co-Creator — *July 2025–Present*

- Developing Live-Lens, a privacy-first AR connected-worker platform for Meta Ray-Bans and mobile devices; built real-time video streaming, supervisor consoles, and OpenCV scene-anchored annotations using Python/FastAPI.

ACCOMPLISHMENTS & OTHER SKILLS

Academics: National Merit Scholarship Finalist | Consistent award-winning academic performance

Extracurriculars: National Dance USA winner (Broadway, NY); Lenaea Theater Festival state gold medalist

Leadership: UIUC Udaan Dance Competition Executive Board | Captain, UIUC Competitive Bollywood Dance Team; led 30+ dancers through practices, performances, and first-ever Nationals appearance
